OFFICIAL

<u>In the claims:</u>

· For the Examiner's convenience all pending claims are presented herein. Those claims that remain unchanged by this amendment are prefixed with "(Unchanged)". Please amend the claims as follows:

1   1.   (Twice Amended) A method for managing entertainment system data,

2 comprising:

3   obtaining a record corresponding to a first entertainment selection [that is

4 selected];

5   <u>presenting a first set of entertainment system data in the obtained record</u>

6 <u>corresponding to the first entertainment selection on a display device</u>;

7   presenting a selectable identifier corresponding to <u>the</u> [a] first set of

8 entertainment system data [in the obtained record on a] <u>on the</u> display device; [and]

9   performing a search for a second entertainment selection having a

10 corresponding second set of entertainment system data related to the first set of

11 entertainment system data when the selectable identifier is selected; and

12   presenting a result of the search on the display device.

1   2.   (Unchanged) The method of Claim 1, wherein obtaining the record

2 comprises referencing an entertainment selection identifier of the first entertainment

3 selection in a database.

Docket No. 042390.P6489
Application No. 09/183,282   -2-

1   3.   (Unchanged) The method of Claim 1, wherein presenting the selectable

2   identifier comprises generating an identifier that is distinguishable from non-selectable

3   text.

1   4.   (Unchanged) The method of Claim 1, wherein performing the search

2   comprises searching a database for the entertainment system data related to the first set of

3   entertainment system data.

1   5.   (Unchanged) The method of Claim 1, wherein presenting the result of the

2   search comprises displaying the result of the search in a synopsis box on the display

3   device.

1   6.   (Amended) A computer-readable medium having stored thereon a

2   sequence of instructions, the sequence of instructions including instructions which, when

3   executed by a processor, causes the processor to perform <u>operations comprising</u> [the steps

4   of]:

5   obtaining a record corresponding to a first entertainment selection [that is

6   selected];

7   <u>presenting a first set of entertainment system data in the obtained record</u>

8   <u>corresponding to the first entertainment selection on a display device</u>;

9   presenting a selectable identifier corresponding to <u>the</u> [a] first set of

10   entertainment system data [in the obtained record on a] <u>on the</u> display device; [and]

11   performing a search for a second entertainment selection having a

12   corresponding second set of entertainment system data related to the first set of

13   entertainment system data when the selectable identifier is selected; and

14   presenting a result of the search on the display device.

Docket No. 042390.P6489
Application No. 09/183,282   -3-

1   7.   (Unchanged) The computer-readable medium of Claim 6, wherein

2   obtaining the record comprises referencing an entertainment selection identifier of the

3   first entertainment selection in a database.

1   8.   (Unchanged) The computer-readable medium of Claim 6, wherein

2   presenting the selectable identifier comprises generating an identifier that is

3   distinguishable from non-selectable text.

1   9.   (Unchanged) The computer-readable medium of Claim 6, wherein

2   performing the search comprises searching a database for entertainment system data

3   related to the first set of entertainment system data.

1   10.   (Unchanged) The computer-readable medium of Claim 6, wherein

2   presenting the result of the search comprises displaying the result of the search in a

3   synopsis box on the display device.

1   11.   (Amended) A system control agent, comprising:

2   a data parser that formats entertainment system data into an identifier

3   portion and a data portion;

4   a data engine, coupled to the data parser, that stores the entertainment

5   system data into a database according to corresponding entertainment selections; and

6   a query interface, coupled to the database, that configures a graphical user

7   interface (GUI) having an identifier corresponding to a first set of entertainment system

8   data of a first entertainment selection, the identifier being [is] selectable to display a

9   second entertainment selection having a corresponding second set of entertainment

10 system data related to the first set of entertainment system data.

1   12.   (Unchanged) The system control agent of Claim 11, wherein the query

2 interface comprises:

3   a user interface unit that receives an identity of the identifier selected;

4   a database interface unit, coupled to the user interface, that searches the

5 database for the second entertainment selection having the corresponding second set of

6 entertainment system data related to the first set of entertainment system data; and

7   a synopsis box building unit; coupled to the database interface unit, that

8 displays the identity of the second entertainment selection on a display device.

1   13.   (Amended) A computer system, comprising:

2   a bus;

3   a processor coupled to the bus;

4   a system control agent, coupled to the bus, that includes a data parser that

5 formats entertainment system data into <u>an</u> [a] identifier portion and a data portion, a data

6 engine that stores the entertainment system data into a database according to

7 corresponding entertainment selections, a query interface that configures a graphical user

8 interface (GUI) having an identifier corresponding to a first set of entertainment system

9 data of a first entertainment selection, the identifier <u>being</u> [is] selectable to display a

10 second entertainment selection having a corresponding second set of entertainment

11 system data related to the first set of entertainment system data.

1   14.   (Unchanged) The computer system of Claim 13, wherein the query

2 interface comprises:

3   a user interface unit that receives an identity of the identifier selected;

4   a database interface unit, coupled to the user interface, that searches the

5 database for the second entertainment selection having the corresponding second set of

6 entertainment system data related to the first set of entertainment system data; and

Docket No. 042390.P6489
Application No. 09/183,282   -5-

7   a synopsis box building unit, coupled to the database interface unit, that

8   displays the identity of the second entertainment selection on a display device.

1   15.   (Amended) A graphical user interface (GUI), comprising:

2   a first set of entertainment system data corresponding to a first

3   entertainment system selection;

4   an identifier corresponding to the [a] first set of entertainment system data

5   of the [a] first entertainment selection, the identifier being [that is] selectable to generate

6   a synopsis box that displays a second set of entertainment system data of a second

7   entertainment selection, the [with a] second set of entertainment system data being

8   related to the first set of entertainment system data.

1   16.   (Unchanged) The method of Claim 1, wherein performing the search

2   comprises performing a search of records of entertainment system data received from a

3   plurality of different sources.

1   17.   (Unchanged) The method of Claim 1, wherein the entertainment selections

2   are selected from the group comprising programs, music selections, software

3   applications, files, and Internet broadcasts.

1   18.   (Unchanged) The method of Claim 1, wherein performing the search

2   comprises performing a search in accordance with instructions stored with the first set of

3   entertainment system data to find other entertainment selections.

1   19.   (Unchanged) The method of Claim 1, wherein the second set of

2   entertainment data is related to the first set of entertainment data in that an item of data

3   corresponding to the same trait is the same in both sets of data.

Application No.: 09/183,282
Docket No.: 042390.P6489   6

1   20.   (Unchanged) The computer-readable medium of Claim 6, wherein

2   performing the search comprises performing a search of records of entertainment system

3   data received from a plurality of different sources.

1   21.   (Unchanged) The computer-readable medium of Claim 6, wherein the

2   entertainment selections are selected from the group comprising programs, music

3   selections, software applications, files, and Internet broadcasts.

1   22.   (Unchanged) The computer-readable medium of Claim 6, wherein

2   performing the search comprises performing a search in accordance with instructions

3   stored with the first set of entertainment system data to find other entertainment

4   selections.

1   23.   (Unchanged) The computer-readable medium of Claim 6, wherein the

2   second set of entertainment data is related to the first set of entertainment data in that an

3   item of data corresponding to the same trait is the same in both sets of data.

1   24.   (Unchanged) The system control agent of Claim 11, wherein the

2   entertainment system data is received from a plurality of different sources.

1   25.   (Unchanged) The system control agent of Claim 12, wherein the database

2   interface unit searches the database in accordance with instructions that it retrieves from

3   storage with the first set of entertainment system data.

1   26.   (Unchanged) The GUI of Claim 15, further comprising non-selectable text

2   corresponding to entertainment system data of the first entertainment selection.

1   27.   (Unchanged) The GUI of Claim 26, wherein the selectable identifier is

2   presented so that it is distinguishable from non-selectable text.
